

Bearing Solutions for Planter Equipment

Keeping the world In motion >>

TOUGH JOBS NEED TOUGH BEARINGS.

Farmer's require their equipment to operate uninterrupted. Any unplanned downtime results in higher operating costs due to maintenance costs and the loss of production time. Bearing failures due to dirty, dusty, and moist environments are not an option. RBI's Planter Equipment Bearings for Closing Wheels and Gauge Wheels are specifically designed to accommodate higher radial loads and to endure the harshest contamination environments. Our engineers have optimized the design of our Planter Equipment Bearings by improving the internal geometry and incorporating a premium seal configuration.

RBI'S 5203KYY2 FEATURES

- 52100 Steel
